

Quality policy

Liros Electronics i Malmö AB is certified in accordance with the regulations of ISO9001:2015, and our product range within GrainWatch™ is ATEX- and IECEx-approved.

The core of our quality policy is to always meet but preferably surpass customer expectations in line with our established business concept. This is done by:

- Our developing and designing of products that not only meet the latest customer and regulatory requirements but also capture future needs of our customers, society and the international community we operate in.
- Choosing subcontractors that meet the highest standards of quality and delivery reliability and are primarily ISO certified.
- All production being done in accordance with our own specifications, our customers' high quality requirements and all relevant regulatory requirements.
- Advice to achieve optimal solutions for the customer.
- Identification and refinement of all elements and processes in our operations, and documentation of this in our Quality Management System, in order to fulfil our obligations towards our customers.
- Performance of all processes/operations in compliance with applicable product safety requirements, from component level to finished product in the case of temperature measurement products with ATEX/IECEx certification. Other products may be controlled by quality assurance plans as required.
- Setting quality objectives to implement the necessary quality management.
- Communication according to the Quality Management System in order to ensure a well-functioning cooperation with each individual customer.
- Translating our experiences and results to continuous improvements of our products and our Quality Management System.
- Promoting a flexible and rational organisation, so that the requirements for resources, efficiency, economy and flawless products are met.

Certificates and scope

To ensure our quality policy, we work according to our Quality Management System, which meets all the system requirements of ISO9001:2015, relevant regulatory requirements and ATEX/IECEx requirements in accordance with 2014/34/EU.

Liros Electronics i Malmö AB is internationally ISO9001:2015 certified by A3 Cert AB, Sweden, with the following scope:

”Development, manufacturing, marketing and sales of products for agricultural processes and selective industry.”
